Super Alloy

LONG TERM RESULTS

Arcoplate kit designs minimize weight and maximize productivity

Arcoplate's uniform hardness and superior microstructure allows for clear projection of wear rates so planned maintenance is achievable. Arcoplate helps to maintain structural integrity in all fixed and mobile plant. Alloy Steel International kit designs improve load discharge and eliminate hang-up material.

Cat 793 @ Cadia Hill Gold NSW

Cat 785C @ Ravenswood QLD

Cat 785C @ Westrac WA

With no weld beads and no under bead cracking Arcoplate is the world's most wear resistant fused alloy steel plate providing superior results in all sliding abrasion, high impact and Anti Hang-up situations
